

<b>Chapters</b>	<b>Contents</b>	<b>Page No</b>
1	Principles of Modern Thermal Power Station	1
	1.1. Introduction	1
	1.2. Thermodynamic Cycles for Power Plants	1
	1.3. Reheat Cycle	3
	1.4. Regenerative Cycle	4
	1.5. Constituents of Modern Thermal Power Plant	5
	1.6. Boiler	6
2	Site and Station Layout	12
	2.1. Introduction	12
	2.2. Ultimate Capacity	12
	2.3. Cooling Water System	12
	2.4. Coal Handling System	13
	2.5. Switchyard	13
	2.6. Colony and Amenities	13
	2.7. Other Common System	13
	2.8. Factors Affecting Site Layout	14
	2.9. Station Layout	16
	2.10. General Design of Power Plants	18
	2.11. Volume and Area Requirements	19
3	Fuels and Combustion	24
	3.1. Introduction	24
	3.2. Fuel-Coal	25
	3.3. Use of Coal in Electricity Generation	26
	3.4. Natural Gas	31
	3.5. Properties of Coal	34
	3.6. Combustion	40

3.7.	Emissions from Coal Usage	42
3.8.	Emission of Carbon Dioxide and Sulfur Dioxide	42
3.9.	Emissions of Oxides of Nitrogen from Coal	43
3.10.	Carbonaceous Material and Black Carbon	45
3.11.	Suspended Particulate Matter	46
3.12.	Optimizing Excess Air and Combustion	46
3.13.	Control of Air and Analysis of Flue Gas	46
3.14.	Combustion of Coal	47
4	Steam Generators	50
4.1.	Introduction	50
4.2.	Boiler Specification	50
4.3.	Boiler Systems	50
4.4.	Boiler Types and Classifications	51
4.5.	Boiler Types (Based on Live Steam)	55
4.6.	Types of Boilers (Based on Industries Use)	60
4.7.	Types of Boilers (Auxiliary Type)	63
4.8.	Super Heaters	64
4.9.	Economisers	65
4.10.	Air Heater (or) Recuperators	66
4.11.	Water Wall Tubes	68
4.12.	Boiler Blow down	68
4.13.	Intermittent Blow down	68
4.14.	Continuous Blow down	69
4.15.	Boiler Water Treatment	69
4.16.	Scale Prevention	71
4.17.	Corrosion Prevention	71
4.18.	Oxygen Attack	71
4.19.	Total Dissolved Solids	72

	4.20. Priming and Foaming	72
	4.21. Burners and Controls	72
	4.22. Recuperation	75
	4.23. Firing Low Temperature Ovens	76
	4.24. Higher Temperature Furnaces	77
	4.25. Safety Controls	78
	4.26. Thermoelectric Safety	78
	4.27. Electronic Quick-Lockout	79
	4.28. Notes on Firing High Temperature Furnaces	79
5	Boiler Control Systems	81
	5.1. Fluid Control System	81
	5.2. Combustion Control	81
	5.3. Pulverized Fuel Mill Control	86
	5.4. Flame Supervision	94
	5.5. Combustion Conditions	101
	5.6. Automatic Control of a Boiler	101
	5.7. Setting Up a Control System	103
	5.8. Steam Temperature Control	106
	5.9. Steam Temperature Control Systems	110
	5.10. Draft Control	111
	5.11. Feed Water Control	124
6	Commissioning and Testing of Boiler	130
	6.1. Introduction	130
	6.2. Preparation of Commissioning Procedures	130
	6.3. Inspection of the Boiler	130
	6.4. Trial Runs of Equipments	131
	6.5. Precommissioning Tests	131
	6.6. Commissioning of Boiler	136

	6.7. Trial Run of the Boiler	136
	6.8. Testing of Boiler	136
	6.9. Programme for Carrying Out Guarantee Test on the Boiler	137
	6.10. Efficiency Evaluation	138
	6.11. Normal Boiler Starting Procedure (Cold Start-up)	139
7	Steam Turbines	141
	7.1. Introduction	141
	7.2. Theory of Operation	142
	7.3. Types of Turbines	143
	7.4. Principle of Operation of Steam Turbine	144
	7.5. Steam Turbines-Types and Arrangements	150
	7.6. Turbines for Cogeneration	151
	7.7. Construction Details of Turbine Components	153
	7.8. Turbine Governing System	154
	7.9. Method of Governing	156
	7.10. Parallel Operation of Two Turbines	158
	7.11. Hydraulic Governor	159
	7.12. Simplified Operation of the Governor	160
	7.13. Turbine Oil System	161
8	Turbine Control System	162
	8.1. Method of Governing	162
	8.2. Programmable Logic Controller	171
9	Steam Turbine Commissioning, Start Up and Shut Down Procedure	177
	9.1. Steam Turbine Commissioning	177
	9.2. Turbine Installation and Operation	177
	9.3. Operating Supervision	179

	9.4. Basic Turbine Starting Procedure	180
	9.5. Turbine Shutdown Procedure	180
	9.6. Starting Up of Turbine	181
	9.7. Starting Turbine From Cold Condition (Cold Start-up)	182
	9.8. Procedure of Starting Turbine from Cold State	184
	9.9. Loading of the Set	186
	9.10. Warm and Hot Start of Turbine	186
	9.11. Warm Start	187
	9.12. Hot Start	188
	9.13. Planned Shut Down of Turbine	188
	9.14. Common Turbine Troubles	189
	9.15. Performance and Testing of Turbine	190
	9.16. Testing of Turbine	190
	9.17. Condensers and Cooling Systems	195
	9.18. Types of Cooling Systems	196
	9.19. Natural Draught Towers	199
	9.20. Mechanical Draught Cooling Towers	200
	9.21. Pumps and Pipes in a Cooling Water System	200
	9.22. Components of Cooling Tower	203
	9.23. Tower Materials	205
	9.24. Cooling Tower Performance	206
	9.25. Environmental Effects of Cooling Systems	208
10	Cogeneration	209
	10.1. Introduction	209
	10.2. Cogeneration Technologies	210
	10.3. Technical Options for Cogeneration	212
	10.4. Steam Turbine Cogeneration Systems	212

	10.5. Gas Turbine Cogeneration Systems	213
	10.6. Reciprocating Engine Cogeneration Systems	214
	10.7. The Advantages of Combined Heat and Power Production	215
	10.8. Large-Scale Plants	216
	10.9. Small-Scale CHP Plants	218
	10.10. The Development Trend of CHP Plants	221
	10.11. Cogeneration Benefits	222
	10.12. Where can cogeneration are used?	223
11	Operational Problems and Emergency Cases in Thermal Power Plant	225
	11.1. Introduction	225
	11.2. Emergency Cases Requiring Shut Down of Boiler	226
	11.3. Shut Down of Unit Requiring Use of Vacuum Breaker	229
	11.4. Shut Down of Turbine Without Use As Vacuum Breaker	230
	11.5. Other Emergency in Boiler	230
	11.6. Emergencies in Turbine	235
	11.7. Emergencies in Generator and Electrical Equipment	237
12	Pollution from Thermal Power Plants	238
	12.1. Introduction	238
	12.2. Thermal Power Plants in India	238
	12.3. Emissions from Thermal Power Plants	239
	12.4. Emissions from Coal Usage	240
	12.5. Power Plants in India	245
	12.6. Emissions from Coal Fired Thermal Power Plants in India	248

	12.7. Energy Activities	250
	12.8. Emissions from Coal Fired Thermal Power Plants	251
13	Thermal Power Plant Economics	253
	13.1. Power Plant	253
	13.2. Requirement of Thermal Power Plant Design	253
	13.3. Useful Life of a Power Plant	254
	13.4. Load Forecasting	255
	13.5. Size of Unit	255
	13.6. Reduction in Operation and Maintenance Costs	256
	13.7. Cost of Generation	257
	13.8. Thermal Efficiency	257
	13.9. Plant Availability	257
	13.10. Capacity Factor	257
	13.11. Utilization Factor	257
	13.12. Requirement of Thermal Power Station	257
	13.13. Cost of Electrical Energy	258
	13.14. Selection of Type of Generation	258
	13.15. Tariffs for Electrical Energy	259
