

Chapter	Contents	Page No
1	Overview	1
	1.1. Software Engineering	1
	1.2. Software Engineering Goals and Practices	6
	1.3. Software Process	9
	1.4. Software Process Modeling	10
2	Analysis on Software Process Models	19
	2.1. Evaluation Process	19
	2.2. Existing Evaluation Methods of Software Process Models	27
	2.3. Solving a Model	41
3	Process Model Development	47
	3.1. Approaches for Software Process Models	47
	3.2. Model Development and the Execution Process	49
	3.3. Design Considerations	58
	3.4. Software Design Description	59
4	Concerned Work and Modeling	61
	4.1. Need for GSPM (Generalized Software Process Model)	61
	4.2. General Model for Software Process	62
	4.3. Software Life Cycle Models	63
	4.4. Table of the Traditional Models	70
	4.5. Shortcomings of Various Software Development Models	72
	4.6. Efficient Paradigm for Implementation of Process Models in Projects	74
5	Generalized Software Process Model - GSPM	79
	5.1. Generalized Software Process Model	79
	5.2. Basic Structural Model for GSPM	81
	5.3. Data Flow Diagram for a Generalized Process Model	82
	5.4. Internal Structure of a Generalized Software Process Model	82
	5.5. Case Study	82
6	Conclusion	96
	References	109
