

Unit	Contents	Page No
I	Introduction to Computers	1
	1.1. Characteristics of Computer	1
	1.2. Limitations	1
	1.3. Applications of Computer	1
	1.4. History of Computer	2
	1.5. Generation of Computer	6
	1.6. Classification of Computer	10
	1.7. Basic Organization of a Computer	12
	1.8. Number System	17
	1.9. Need for Logical Analysis and Thinking	22
	1.10. Algorithm	24
	1.11. Pseudocode	25
	1.12. Flowchart	27
	Exercise	31
II	Basics of C Programming	32
	2.1. Introduction to Programming Paradigm	32
	2.1.1. Problem Formulation	33
	2.1.2. Problem Solving	33
	2.2. Introduction to 'C' Programming	35
	2.3. Fundamentals	36
	2.3.1. C Character Set	36
	2.3.2. Identifiers	36
	2.3.3. Keywords	37
	2.3.4. Declaration and Definition	37
	2.4. Structure of 'C' Program	37
	2.5. Constants, Variables and Data types	40
	2.6. Enumeration Constraints	44
	2.7. Storage Class	45
	2.7.1. Automatic Storage Class	47

2.7.2. Extern Storage Class	48
2.7.3. Static Storage Class	49
2.7.4. Register Storage Class	50
2.8. Expression Using Operators in C	51
2.8.1. Classification of Operators Based on Number of Operands	53
2.8.2. Classification of Operators based on the Role of the Operator	53
2.9. Managing Input and Output Operations	57
2.10. Assignment Statements	60
2.11. Decision Making and Branching Statements	61
2.12. Looping Statements	68
2.13. Pre-processor Directives	72
2.13.1. File Inclusion Directives	72
2.13.2. Macro Substitution Directives	73
2.13.3. Conditional Inclusion	74
2.14. Compilation and Linking Process	76
2.15. Basic Example Programs	77
Exercise	86
III Arrays and Strings	89
3.1. Introduction to Arrays	89
3.2. Types of Array	90
3.2.1. One Dimensional Array	90
3.2.2. Two-dimensional Array	93
3.3. Example Programs	95
3.4. String	112
3.5. String Operations	113
3.6. Sorting	124
3.6.1. Internal Sort Algorithms	125
3.6.2. External Sort Algorithms	130
3.7. Searching	131

3.7.1. Linear Search	132
3.7.2. Binary Search	133
Exercise	136
IV Functions and Pointers	138
4.1. Introduction to Functions	138
4.2. Function Prototype (or) Declaration	139
4.3. Function Definition	139
4.4. Classification of Functions	141
4.5. Built-in Functions	147
4.6. Recursion	150
4.6.1. Linear Recursion	151
4.6.2. Binary Recursion	152
4.7. Example Program	155
4.8. Introduction to Pointers	159
4.9. Initialization of Pointer Variable	160
4.10. Operations on Pointers	161
4.11. Pointer Arithmetic	162
4.12. Pointers and Arrays	165
4.13. Array of Pointers	166
4.14. Parameters	168
4.15. Example Programs	172
Exercise	178
V Structures	181
5.1. Introduction	181
5.1.1. Structure Definition	181
5.1.2. Need for Structure Data Type	181
5.1.3. Characteristics of Structure	182
5.2. Structure Declaration	182
5.3. Structure Initialization	183
5.4. Nested Structure	185
5.5. Array of Structures	187

5.6.	Structure and Functions	189
5.6.1.	Passing Array of Structure to Function	190
5.7.	Self Referential Structure	192
5.8.	Union	193
5.9.	Dynamic Memory Allocation	194
5.10.	Typedef	200
5.11.	Introduction to Data Structure	202
5.11.1.	Classification of Data Structure	202
5.11.2.	ADT	203
5.12.	List	203
5.12.1.	Implementation of List	204
5.12.2.	Types of Linked List	204
5.13.	Singly Linked List	204
VI	File Processing	225
6.1.	Why Files?	225
6.2.	Definition	225
6.3.	Types of Files	225
6.4.	Files and Streams	226
6.4.1.	File Declaration	228
6.4.2.	File Pointer	228
6.5.	File Operations (for Both Text and Binary Files)	228
6.5.1.	fopen()	228
6.5.2.	fclose()	230
6.5.3.	fprintf()	230
6.5.4.	fscanf()	231
6.5.5.	fwrite()	233
6.5.6.	fread()	233
6.5.7.	fgets()	236
6.5.8.	fputs()	237
6.5.9.	fgetc()	239
6.5.10.	fputc()	239

6.5.11. fseek()	243
6.5.12. rewind()	244
6.5.13. ftell()	244
6.5.14. feof()	249
6.5.15. perror()	250
6.5.16. Remove()	251
6.5.17. rename()	252
6.5.18. putw() and getw()	252
6.6. File Processing Types	254
6.6.1. Sequential Access File Processing	254
6.6.2. Random Access File Processing	258
6.7. Command Line Arguments	266
Exercise	279

Appendix

- A Question Bank
- B Solved University Question Paper
