

Chapter	Contents	Page No
1	Introduction	1
	1.1. Statement of Problem	1
	1.2. Objective	2
	1.2.1. General Objective	2
	1.2.2. Specific Objectives	2
	1.3. Scope of the Study	2
	1.4. Limitation of the Study	2
	1.5. Research Methodology	2
	1.6. Significance of the Study	3
	1.7. Arrangement of Thesis	3
	1.8. Background Information	3
2	Literature Review	5
	2.1. Introduction	5
	2.2. Technology of Reverse Engineering	7
	2.3. Types of Reverse Engineering	8
	2.4. Engineering and Digital Prototyping Techniques	10
	2.5. Why we Use Reverse Engineering?	10
	2.6. Disc Harrow	11
	2.6.1. Harrow	11
	2.6.2. Disc Harrow	11
	2.6.3. Single Action Disc Harrow	11
	2.6.4. Double Action Disc Harrow	12
	2.7. Disc Harrow Frame Types and their Design	14
	2.8. Tractor Disc Harrow Frame	15
	2.9. Performance and Special Features	17
	2.10. Program Understanding Research	18
	2.10.1. The Reverse Engineering Process, from reference	18
	2.10.2. The Reverse Engineering Process: Disassemble, Measure and Analyze Product	18
	2.10.3. The Reverse Engineering Process: Create Bill of Materials (BOM)	19

2.10.4. Reverse Engineering: Subtract and Operate Procedure (SOP)	19
2.10.5. Additional Notes on Subtract and Operate Procedure (SOP)	20
2.11. Product Engineering	20
2.12. Forward Engineering Product Design Method	21
2.13. Basic Theory of Jig and Fixture Design	22
2.13.1. Jigs	22
2.13.2. Elements in Jigs	22
2.14. Fixture	23
2.14.1. Elements of Fixtures	23
2.14.2. Fixture Design Procedure	23
2.15. Design of Drilling Jigs	24
2.16. Design of Welding Fixtures	25
2.17. Creative Tool Design	26
2.17.1. Defining Requirements	27
2.17.2. Gathering and Analyzing Information	28
2.17.3. Workpiece Considerations	28
2.17.4. Operation Considerations	28
2.17.5. Equipment Considerations	29
2.17.6. Personnel Considerations	29
3 Methods and Materials	30
3.1. Methodologies	31
3.2. Reverse Engineering Design Process	31
3.3. Existing Disc Harrow Frame	31
3.4. The Application of Reverse Engineering (RE)	32
3.5. Collecting and Preparing the Initial Information	33
3.6. Disassemble (information about the product)	33
3.7. Methodology Planned and Data Analysis	34
3.8. Preparing the Development Process	35
3.9. Customer Needs	35
3.10. Analysis of Reference	36

	3.10.1. Reverse Engineering a Current Disc Harrow Frame	36
	3.10.2. CAD-Model of Reference Disc Harrow Frame (DHF)	36
4	Design of the Frame Structure	38
	4.1. Redesign of Disc Harrow Frame Structure	38
	4.2. Needs and Benefits of RE	38
	4.3. Identify the Product	39
	4.4. RE Design Decision and Parts of the Disc Harrow Frame	40
	4.5. Determine Customers Need and Process Development	43
	4.6. Customer Needs	44
	4.7. Analysis of Reference	44
	4.8. Product Tear Dawn	45
	4.9. Obtaining the Part Geometry	45
	4.10. Function Analysis	50
	4.10.1. Functional Requirements Analysis	50
	4.10.2. Feature of the Design Classification	51
	4.11. 3D Modeling of the Components	55
	4.12. Analysis and Model Revise Results of Disc Harrow Frame	56
	4.13. Conclusion	58
5	Process Development of Fixture and Jig	59
	5.1. Design of Fixture Elements for Disc Harrow Frame	59
	5.2. Process Planning of Fixture	59
	5.3. Selection of Manufacturing Process for Fixture	60
	5.3.1. Designing of Fixture	60
	5.3.2. Choice of Developed Process for Fixture	61
	5.3.3. Process Development of the Fixture	61
	5.4. Degrees of Freedom for Solid Parts	62
	5.5. Fixture Supporters and Locators Manufacturing Process	64
	5.6. Designing of Drill Jig	65
	5.7. General Considerations in Designing- Jigs	66
	5.8. Drilling the Same Size and Number of Holes at a Workpiece	66
6	Cost Estimation for Tooling	68
	6.1. Cost Analysis	68

6.2. The Costs of Raw Materials and the Cost of Standard Items	68
6.3. Operation Process Costs	69
6.4. Labor Costs	70
6.5. Overhead Costs	71
6.6. Machine Depreciation Cost	71
6.7. Cost of Power Consumption	72
6.8. Total Cost of the Fixture	73
7 Conclusions and Recommendations	74
7.1. Conclusions	74
7.2. Recommendations	74
7.3. Future Works	75
References	76
