

Chapter	Contents	Page No
Part I	C Programming Fundamentals–A Review	1
1	C Programming Fundamentals - A Review	2
	1.1. Introduction	2
	1.2. Basic Structure of C Programming	3
	1.3. C Tokens	5
	1.3.1. C Identifiers	5
	1.3.2. C - Reserved Keywords	5
	1.3.3. C - Basic Data Types	5
	1.3.4. C Modifiers	6
	1.3.5. C Qualifiers	6
	1.3.6. C - Variable	7
	1.3.7. C - Storage Classes	7
	1.3.8. C Constants	10
	1.3.9. C Escape Sequences	11
	1.4. Operators in C	12
2	Conditional and Control Statements in C	16
	2.1. Introduction	16
	2.1.1. Simple if Statement	16
	2.1.2. if else Statement in C	17
	2.1.3. Nested if in C	17
	2.1.4. If else Ladder	18
	2.1.5. Switch Statement in C	19
	2.1.6. Goto Statement in C	20
	2.1.7. Break Statement in C	21
	2.1.8. Continue Statement in C	22
	2.2. Introduction to Control Statements in C	22
	2.2.1. While Loop	23
	2.2.2. Do...While Loop	23
	2.2.3. For Loop	24
	2.3. Sample Programs Using Conditional and Control Statements	25
3	Functions	34
	3.1. Introduction	34
	3.2. Types of C Functions	34
	3.2.1. C – Library Functions	34
	3.2.2. Sample Program Using Library Functions	36

3.2.3. C - User Defined Function	37
3.2.4. Function Declarations	38
3.2.5. Function Call	38
3.2.6. Defining a Function	38
3.2.7. Sample Program Using User Defined Functions	39
3.3. Parameter Passing Methods	39
3.3.1. Function - Call by Value in C	40
3.3.2. Function - Call by Reference in C	40
3.4. Function Prototypes	41
3.4.1. Function with No Arguments and No Return Value	42
3.4.2. Function with No Arguments but Return Value	42
3.4.3. Function with Arguments and No Return Value	44
3.4.4. Function with Argument and a Return Value	44
3.5. C-Recursion	45
3.6. Sample Programs for Functions	47
4 Arrays	53
4.1. Introduction	53
4.2. Types of Array	53
4.3. Declaring One Dimensional Array	53
4.4. Initializing One Dimensional Arrays	53
4.5. Accessing Array Elements	54
4.6. Passing Arrays as Function Arguments in C	56
4.7. Sample Program for Arrays	59
5 String	68
5.1. Introduction	68
5.2. Declaration of Strings	68
5.3. Initialization of String	68
5.4. Reading String	69
5.5. Passing Strings to Functions	69
5.6. String Manipulations Using Library Functions	70
5.7. Sample Programs for String Manipulations	71
6 Preprocessor	77
6.1. Introduction	77
6.2. Preprocessor Directives in C	77
6.3. Preprocessors Examples	77
6.4. Predefined Macros	78

6.5.	Preprocessor Operators	78
6.5.1.	Macro Continuation (\)	79
6.5.2.	Stringize (#)	79
6.5.3.	Token Pasting (##)	79
6.5.4.	The defined() Operator	80
6.5.5.	Parameterized Macros	80
7	Pointers	82
7.1.	Introduction	82
7.2.	Reference Operator(&)	82
7.3.	Working of Pointers in C	82
7.4.	Variation in Pointer Declarations	83
7.4.1.	NULL Pointers in C	83
7.4.2.	Void Pointers in C	84
7.4.3.	Dereferencing Operator (*)	84
7.5.	Function Pointers	84
7.5.1.	Function Pointer Without Argument	85
7.5.2.	Function Pointer with Argument	86
7.5.3.	C - Pointer to Pointer	86
7.5.4.	Pointer Arithmetic	87
7.5.5.	Pointer and Array	87
8	Function with Variable Number of Arguments	89
8.1.	Introduction	89
8.2.	Sample Program	90
	Review Questions	91
Part II	C Programming Advanced Features	100
9	Structure and Union	101
9.1.	Introduction	101
9.2.	Defining a Structure	101
9.3.	Accessing Structure Members	101
9.4.	Structure as Function Argument	102
9.5.	Structure and Pointer	103
9.6.	Array of Structure	104
9.7.	Self-Referential Structure	105
9.8.	Union	105
9.9.	Accessing Union Members	106
9.10.	Difference between Structure and Union	107

	9.11. Type Def in C	107
	9.12. Sample Programs Using Structure and Union	108
10	File Handling Concepts	112
	10.1. Introduction	112
	10.2. Need for a File	112
	10.3. File Operations	112
	10.4. Types of File	112
	10.4.1. Text File	112
	10.4.1.1. File Open	112
	10.4.1.2. File Close	113
	10.4.1.3. Writing a File	113
	10.4.1.4. Reading a File	114
	10.4.2. Binary File	115
	10.4.2.1. Binary File Modes	116
	10.4.2.2. Binary I/O Functions	116
	Review Questions with Solution	123
Part III	Linear Data Structures-List	129
11	Overview of Linear Data Structure-List	130
	11.1. Introduction to Data Structures	130
	11.2. Application of Data Structures	130
	11.3. Classification of Data Structure	131
	11.4. Abstract Data Type(ADT)	131
	11.5. List ADT	132
	11.5.1. Methods to Implement a List	132
	11.5.2. Array Implementation of List	132
	11.5.3. Linked List Implementation of List	139
	11.5.4. Singly Linked List (SLL)	139
	11.5.5. Doubly Linked List (DLL)	145
	11.5.6. Circular Linked List	149
	11.6. Applications of Linked List	153
	11.7. Sample Programs	156
	Review Questions with Solutions	166
Part IV	Linear Data Structures-Stack, Queue	172
12	Linear Data Structures-Stack	173
	12.1. Introduction	173
	12.2. Stack Model	173

	12.3. Operations on Stack(Stack ADT)	173
	12.4. Implementation of Stack	174
	12.4.1. Array Implementation of Stack	174
	12.4.2. Linked List Implementation of Stack	179
	12.5. Applications of Stack	186
	12.5.1. Evaluating the Arithmetic Expression	186
	12.5.2. Towers of Hanoi	195
	12.5.3. Function Calls	198
	12.5.4. Balancing the Symbols	198
13	Queue	201
	13.1. Introduction	201
	13.2. Queue Model	201
	13.3. Operations on Queue	201
	13.4. Implementation of Queue	202
	13.4.1. Array Implementation of Queue	202
	13.4.2. Linked List Implementation of Queue	207
	13.5. Applications of Queue	212
	13.6. Drawbacks of Queue (Linear Queue)	213
14	Circular Queue	214
	14.1. Introduction	214
	14.2. Operations on Circular Queue	214
15	Double-Ended Queue (DEQUE)	219
	15.1. Introduction	219
	15.2. Exceptional Condition of DEQUE	219
	15.3. Operations on DEQUE	220
	Review Questions with Solution	224
Part V	Sorting, Searching and Hash Techniques	228
16	Sorting	229
	16.1. Introduction	229
	16.2. Types of Sorting	229
	16.3. Sorting Algorithms	229
	16.3.1. Insertion Sort	230
	16.3.2. Selection Sort	232
	16.3.3. Shell Sort	234
	16.3.4. Bubble Sort	236
	16.3.5. Quick Sort	239

	16.3.6. Merge Sort	242
	16.3.7. Radix Sort	246
17	Searching	249
	17.1. Introduction	249
	17.2. Types of Searching	249
	17.2.1. Linear Search	249
	17.2.2. Binary Search	250
	17.3. Working Principle	251
18	Hashing	253
	18.1. Introduction	253
	18.2. Types of Hash Functions	254
	18.3. Collision	256
	18.4. Collision Resolution Strategies/Techniques (CRT)	256
	18.4.1. Separate Chaining (Open Hashing)	256
	18.4.2. Open Addressing	261
	18.4.3. Linear Probing	261
	18.4.4. Quadratic Probing	263
	18.4.5. Double Hashing	264
	18.5. Rehashing	265
	18.6. Extendible Hashing	266
	18.7. Applications of Hashing	266
	Review Questions with Solution	267
	Sample Question Papers	270
