

UNIT	CONTENTS	PAGE NO
UNIT I	INTRODUCTION	1
	1.1. Scalable Computing Over the Internet	1
	1.2. The Age of Internet Computing	1
	1.3. Scalable Computing Trends and New Paradigms	5
	1.4. The Internet of Things and Cyber-Physical Systems	8
	1.5. Technologies for Network-based Systems	10
	1.6. Clusters of Cooperative Computers	15
	1.7. Grid Computing Infrastructures	16
	1.8. Cloud Computing Over the Internet	18
	1.9. Service-Oriented Architecture (SOA)	21
UNIT-II	GRID SERVICES	24
	2.1. Grid Architecture and Service Modeling	24
	2.2. Grid History and Service Families	24
	2.3. CPU Scavenging and Virtual Super Computers	26
	2.4. Grid Resource Aggregation	27
	2.5. Virtual Organization	28
	2.6. OGSA Framework	28
	2.7. Data-Intensive Grid Service Models	31
UNIT-III	VIRTUALIZATION	35
	3.1. Cloud Computing and Service Models	35
	3.2. Implementation Levels of Virtualization	38
	3.3. Virtualization Structures/Tools and Mechanisms	46
	3.4. Virtualization of CPU, Memory, and I/O Devices	51
	3.5. Virtualization for Data-Center Automation	64
UNIT-IV	PROGRAMMING MODEL	69
	4.1. Open Source Grid Middleware Packages	69
	4.2. The Globus Toolkit Architecture (GT4)	70

4.3. Hadoop Library from Apache	81
UNIT-V SECURITY	86
5.1. Trust Models for Grid Security Enforcement	86
5.2. Grid Security Infrastructure (GSI)	89
CONTENT BEYOND SYLLABUS	237
