Section–I

Chapter	Contents	Page No
1	**Basic Concepts of Measurement**	**1**
	1.0. Introduction	1
	1.1. Basic Concept of Measurement	3
	1.2. Functions of the Measuring Instruments	7
	1.3. Advantages & Disadvantages of Measuring Instruments	7
	1.4. Errors in Measuring Instruments	8
	1.5. Important Terms of Measurement Process	14
	1.6. Modification and Interference of Inputs Signal	18
	1.7. Normal Distribution Curve	19
	1.8. Variables	22
	1.9. Measurement Scale	23
	1.10. Noise	26
	1.11. Calibration	28
	1.12. Dynamic Calibrations or Frequency Response	34
	1.13. Measurement System Model	39
	1.14. Solution to the Differential Equations	45
	1.15. Phase Linearity	50
	1.16. Data Presenting Technique	51
	Question for Discussion	61
	References	64
2	**Statistics & Error Uncertainty**	**65**
	2.0. Linear Regression	65
	2.1. Multiple Regression Method	73
	2.2. Steps of Regression Analysis	75
	2.3. Uncertainty Analysis	80
	2.4. Classification of Errors	85
	2.5. Variable but Deterministic Error	87
	2.6. Combining Errors or Root Sum Squares (RSS) Method	88

2.7. Calibration (Systematic) 90
2.8. Design-Stage Uncertainty Analysis 90
2.9. Estimating Experimental Uncertainty for a Single Measurement 94
2.10. Outliers 95
2.11. Box-plot 97
2.12. Trimmed Means 98
2.13. Extreme Studentized Deviate 98
2.14. Dixon-type Tests 99
2.15. Outliers in Regression 100
2.16. Data Acquisition 100
2.17. Data-Acquisition Systems 106
2.18. Error Considerations: Following Errors are Associated with Data Acquisition 108
2.19. Data Reduction 109
2.20. Principle of Data Reduction 111
2.21. Data Reduction Procedure 112
2.22. Data Verification 113
2.23. Standard Deviation and Normal Distribution 113
2.24. Chi-squared Distributions 118
2.25. Error Propagation 119
2.26. Advanced-Stage Uncertainty Analysis 132
2.27. Higher Order Uncertainty 134
Question for Discussion 136
References 138
3 Temperature Measurement 139
3.0. Temperature Measurement 139
3.1. Temperature Scales 140
3.2. Thermometry 141
3.3. Bimetallic Thermometer 144
3.4. Type of Bimetallic Thermometers 145

3.5. Resistance thermometry 147
3.6. Thermistor 149
3.7. Thermocouple 153
3.8. Pressure Measurement 156
3.9. Barometric Pressure Measurement 159
3.10. Pressure Measurement by Manometers 162
3.11. Classification of Manometer 162
3.12. Dead Weight Tester 170
3.13. Pressure Gauges and Transducers 172
3.14. Linear Voltage Differential Transducer (LVDT) 180
3.15. Rotary Variable-Differential Transformer 182
3.16. Piezoelectric Pressure Transducer 182
3.17. Bonded Strain Gauge 187
3.18. Pressure Tube with Bonded Strain Gage 189
3.19. Total Static Pressure Measurement in Moving Fluids 190
3.20. Dynamic Pressure Measurement 191
3.21. Flow Measurement 192
3.22. Type of Orifice Plate 198
3.23. McLeod Gauge 202
3.24. Pirani Vacuum Gauge 204
3.25. Thermocouple Vaccum Gauge 206
3.26. The Bridgman Gauge 207
3.27. Penning Vacuum Gauge 208
Question for Discussion 234
References 239
4 Strain Measurement 241
4.0. Stress 241
4.1. Type of Strain Gauge 241
4.2. Measurement of Strain 244
4.3. Apparent Strain 246
4.4. Self-Temperature-Compensation Gauges 247

4.5. Strain Gage Bridges Circuits 248
4.6. Gage Factor (GF) 250
4.7. Displacement Measurement 253
4.8. Angular Displacement Measurement 257
4.9. Type of Potentiometer 259
4.10. Velocity Measurement 261
4.11. Tachogenerator 265
4.12. AC Tachometer Generators 272
4.13. D.C. Tacho-meter Generator 273
4.14. Variable-Reluctance Tachometer Generators 274
4.15. Stroboscopic 275
4.16. Electrical Stroboscope 276
4.17. Force 278
4.18. Piezoelectric Electric Load Cell/Force Transducers 283
4.19. Magneto-Elastic Force Transducer 285
4.20. Analytical Balance or Direct Method 286
4.21. Unequal Arm Balance 288
4.22. Platform Balance (Multiple Lever System) 289
4.23. Proving Ring 290
4.24. Torque Measurement Technique 291
4.25. Torque Reaction Method 294
4.26. Electrical Torsion Meter 295
4.27. Optical Torsion Meter 296
4.28. Torque Measurement by Prony Brake 296
4.29. Differential Transformer Torsion Meter 297
4.30. Power Estimation from Rotational Shaft 298
4.31. Prony Brake Dynometer 299
4.32. Eddy Currents Dynamometers 300
4.33. Hydraulic Dynamometer 300
Question for Discussion 321
References 325

5 Control Systems 326
5.0. Introduction 326
5.1. Design of Control System 327
5.2. Control System Concept 328
5.3. Control System Basic Architecture 330
5.4. Feedback Loop of Control System 331
5.5. Effect of Feedback 332
5.6. Control System Configuration 333
5.7. Transfer Function 334
5.8. Classification of Control System 337
5.9. Open Loop Control System 339
5.10. Closed Loop Control System 340
5.11. Negative Feedback Control System 342
5.12. Characteristics of Good Control System 344
5.13. Block Diagrams of Control System 345
5.14. Laplace Transformation of System Model 348
5.15. Calculation of Transfer Function of Control System 348
5.16. Modeling of Control System 349
5.17. Modeling of Mechanical Systems 350
5.18. Calculation of Transfer Function 353
5.19. Modeling of Simple Translational System 355
5.20. Modeling of Rotational Mechanical Systems 363
5.21. Calculation of Work, Energy, and Power 366
5.22. Modeling of Electrical Systems 371
5.23. Governing Law for Electrical Modeling 377
5.24. Electrical Circuits Modeling for RLC Circuit 379
5.25. Analogous Parameters for Electrical Modeling 382
5.26. Force Voltage Analogy 383
5.27. Liquid Level Systems 386
5.28. Modeling of Fluid System 390
5.29. Fluid Energy Source 399

5.30. Modeling of Thermal System 399
5.31. Governing Laws 401
5.32. Analogy for Thermal Modeling 401
5.33. Transfer Function of Thermal System 407
5.34. Laplace Transform 409
5.35. Signal Flow Graph for Control System 410
5.36. Construction of Signal Flow Graph 415
5.37. Block Diagram Reduction technique 418
5.38. Block – Diagram Reduction Equation 422
5.39. Transient Response Specifications 425
5.40. Characteristics of First Order Systems 426
5.41. The Characteristic Response of First-Order Systems 429
5.42. Second Order Systems 429
5.43. Derivation for Second-Order System Transient Response 432
5.44. The Step Response of a Second-Order System 436
5.45. The Impulse Response 437
5.46. The Characteristic Impulse Response 437
Question for Discussion 452
References 458
Indexing

Section–II

Lab Work

1	To Study about the Resistance Temperature Detector	459
2	To study about various Temperature Measuring Instruments	462
3	To measure torque of a rotating shaft using torsion meter/strain gauge Torque transducer	465
4	To measure the linear displacement by using L.V.D.T	467
5	Measuring torque and power generated by a prime mover by using pony brake dynamometer	470
6	Measuring velocity of fluid flow with the help of Ventura meter and orifice meter	472
7	Measuring velocity of fluid flow with the help of pitot-tube	476
8	Study of various pressure measuring devices like manometers, mercury in glass pressure gauge etc	478
9	To Study about the measuring devices like Vernier Caliper & Micrometer	484
10	To Study about the measuring devices like Micrometer	486
11	To measure the speed of a motor by 'Photo Pickup' and Magnetic Pickup methods	488
12	To measure the pressure or force applied with the help of piezoelectric load cells	490
13	To study the measurement of strain by strain gauge device	491
14	To Study about the displacement by variable capacitance transducers	493
15	To Study about the calibration of the given pressure gauge	494

Section–III

Formula for Numerical Problem
