

TABLE OF CONTENTS

Chapter No	Contents	Page No
1	Introduction to Ceramic Material	01
	1.1. Introduction	01
	1.2. Ceramics	02
	1.3. Types of Ceramic	04
	1.3.1. Classification of Ceramics on the Basis of Composition & Applications	07
	1.3.2. Classification of Ceramics on the Basis of Thermal Properties	24
	1.3.3. Classification of Ceramics on the Basis of Atomic Structure & Bonding	27
	1.3.4. Crystal Structure of Ceramics	31
	1.4. Non Crystalline Structure	42
	1.5. Ceramic Structure with a Single Element	42
	1.6. Binary Ceramic Structure	42
	1.7. Ternary Ceramic Structure	45
	1.8. ABX ₃ Ceramic Structure	47
	1.9. Perovskites Structure	48
	1.10. Carbides Structure	49
	1.11. Silicate Structures	49
	1.12. Bonding in Ceramics	51
	1.13. Defect in Ceramics	53
	1.13.1. Point Defect	53
	1.13.2. Vacancies	54
	1.13.3. Compositional Defects	56
	1.13.4. Frankel Defects	56
	1.13.5. Schottky Defects	56

	1.13.6. Dislocation or Line Defects	56
	1.13.7. Edge Dislocations	56
	1.13.8. Screw Dislocation	56
	1.14. Defects in Ceramics	57
	1.15. Point Defect Creation in Ceramic Material	58
	1.15.1. Substitutional Defects	59
	1.16. Equation for Point Defects	60
	1.17. Frenkel Defects	61
	1.18. Schottky Defects	63
	1.19. Electronic Defects	66
	1.20. Defects Due to Diffusion	66
	1.21. Diffusion in Impure or Doped Ceramics	68
	1.22. Movements Defects in Ceramics	68
	1.23. Grain Boundary Defects	69
	1.23.1. Effects of Conductivity & Diffusion on Ions Movements	69
	1.24. Dislocation in Ceramics	69
	1.25. Dislocation Strain Energy	72
	1.25.1. Dislocation in Silicon	73
	1.25.2. Dislocation in Olivine	74
	1.25.3. Climb Dissociation	74
	1.25.4. Dislocation Interaction	74
	1.25.5. Importance of Dislocation	75
	1.26. Polymorphic Transformation	75
	1.27. Polymorphic Transformation of Silica	77
	1.28. Polymorphic Transformation of Zirconia Ceramics	85
	1.29. Polymorphic Transformation of Alumina Ceramics	88
	1.29.1. Transformation of Alumina Polymorphs	88
	1.30. Polymorphic Transformation of BaTiO ₃ Ceramics	92

	1.30.1. Cubic Structure Polymorphic form of BaTiO ₃	92
	1.30.2. Tetragonal Structure Polymorphic form of BaTiO ₃	92
	1.30.3. Orthorhombic Structure Polymorphic Form of BaTiO ₃	93
	1.30.4. Rhombohedral Structure Polymorphic Form of BaTiO ₃	94
	1.31. Raw Material for Ceramics Products	96
	1.32. Plastic Raw Material	97
	1.32.1. Kaolinite Group	98
	1.32.2. Montmorillonite Group	98
	1.32.3. Illite or Hydromica Group	99
	1.33. Property of Clay	102
	1.33.1. Flow Property	102
	1.33.2. Plasticity	102
	1.33.3. PH Value of Clay & Water Mixture	102
	1.34. Affinity of Dry Clay for Water	103
	1.35. Non – Plastic Raw Material for Ceramics	104
	1.36. Aluminium & Silica as a Raw Material for Ceramics	107
	1.36.1. Alumina	108
	1.37. Calcium & Magnesium Compounds	108
	1.37.1. Magnesite	108
	1.37.2. Lithium Compounds as a Raw Material for Ceramics	109
	1.37.3. Sodium Compound	109
	1.38. Additional Raw Material	112
	1.39. Some other Ceramic Raw Materials or Compound with Short Brief Description	113
	1.40. Chronological Development of Ceramics	117

	1.40.1. Contribution of Indian Culture in Ceramics Manufacturing & Developments	120
	Question for Discussion	125
	References	126
2	Amorphous Material	138
	2.1. Non Crystalline Materials and their Structure	138
	2.2. Glass	138
	2.3. Classification of Glass	139
	2.3.1. Composition of Glass	142
	2.3.2. Alumina - Silicate Glass	142
	2.3.3. Soda Lime - Glass	143
	2.4. Manufacturing of Soda Lime Glass	146
	2.5. Boro - Silicate Glass	147
	2.5.1. Type of Boro - Silicate Glass	148
	2.5.2. Composition of Pyrex Glass	149
	2.5.3. Structure of Boro - Silicate Glass	151
	2.6. Fused Silica Glass	153
	2.6.1. Lead Alkali Silica Glass	154
	2.6.2. 96 % Silica Glass	155
	2.7. Glass - Ceramics	155
	2.8. Structure of Silicates	156
	2.8.1. Tecto-silicates (Framework Silicates)	157
	2.8.2. Phyllosilicates (Sheet Silicates)	158
	2.8.3. Inosilicates (Single or Double Chain Silicates)	158
	2.8.4. Cyclosilicates (Ring Silicates)	159
	2.8.5. Soro - Silicates (island Silicates)	160
	2.8.6. Neso - Silicate	160
	2.9. Glass Transformation Temperature Curve	161
	2.10. Role of Viscosity in Glass Transition	163

	2.10.1. Measurement of Viscosity	165
	2.11. Zachariasen's Rules	166
	2.12. Devitrification of Glass	166
	2.12.1. Nucleation Stage	167
	2.12.2. Growth Stage	168
	2.13. Glass Manufacturing Process	168
	2.13.1. Melting Process	169
	2.13.2. Forming Process	170
	2.13.3. Pressing	170
	2.13.4. Casting or Moulding Process	172
	2.13.5. Blowing Process	172
	2.13.6. Drawing Operation	173
	2.14. Heat Treatment of Glass	173
	2.15. Ceramic System	173
	2.15.1. Type of Ceramic System	176
	2.15.2. Unary or Single Ceramic System	176
	2.15.3. Binary Ceramic System	183
	2.15.4. Intermediate Compounds	194
	2.15.5. Ternary Ceramic System	195
	2.16. Type of ternary Diagram	200
	2.16.1. Gibbs Triangle	200
	2.16.2. Ternary Phase Diagram	202
	Question for Discussion	218
	References	219
3	Ceramic Processing	228
	3.1. Ceramic Processing	228
	3.2. Powder Preparation	229
	3.2.1. Preparation of Aluminium Oxide Powder	233
	3.2.2. Preparation of Magnesium Oxide Powder	233

	3.2.3. Preparation of Silicon Carbide Powder	233
	3.2.4. Preparation of Silicon Nitride Powder	234
	3.2.5. Preparation of Zirconia Ceramic Powder	234
	3.2.6. Thermal Decomposition Method	235
	3.3. Pre-consolidation	236
	3.4. Spray-drying	238
	3.4.1. Granulation	239
	3.5. Forming or Shaping	239
	3.5.1. Classification of Forming Process	239
	3.5.2. Power Compaction	240
	3.5.3. Dry Pressing	242
	3.5.4. Hot Pressing	244
	3.5.5. Uniaxial Pressing	249
	3.5.6. Iso-static Pressing	251
	3.5.7. Wet Bag iso-static Processing	252
	3.5.8. Dry Bag iso-static Pressing	252
	3.5.9. Hot – iso-static Pressing	254
	3.6. Casting Process	256
	3.6.1. Slip Casting	257
	3.6.2. Slip Casting Process	258
	3.6.3. Drain Casting	259
	3.7. Solid State Casting	260
	3.8. Vacuum Casting	260
	3.9. Centrifugal Casting	260
	3.10. Pressure Casting	260
	3.11. Gel Casting	261
	3.12. Tape Casting Technique	261
	3.13. Doctor Blade Tape Casting Process	262
	3.14. Water Fall Tape Casting Technique	263

	3.15. Paper Tape Casting Technique	264
	3.16. Plastic Forming Technique	266
	3.16.1. Extrusion Process	266
	3.16.2. Device Required for Extrusion Process	267
	3.17. Wet Pressing	269
	3.18. Injection Molding	270
	3.18.1. Application of Injection Molding Technique	274
	3.19. Roll Forming	275
	3.20. Compression Molding	275
	3.21. Sintering of Ceramic	276
	3.21.1. What Will be Going on During Sintering Process	276
	3.22. Liquid Phase Sintering	278
	3.23. Sintering Stages	279
	3.24. Classification of Sintering Technique	282
	3.24.1. Vapour Phase Sintering Technique	283
	3.24.2. Solid – State Sintering Technique	284
	3.24.3. Liquid Phase Sintering	285
	3.24.4. Reactive Liquid Sintering	286
	3.25. Advanced Sintering Technique	287
	3.26. Chemical Process	289
	3.27. Cementitious Bonding	289
	3.28. Pyrolysis	290
	3.29. Vapour Processing	291
	3.30. Infiltration	291
	3.31. Melt Infiltration	291
	3.32. Vapour Infiltration	291
	3.33. Polymer Infiltration	291
	3.34. Metal Gas Reaction	292
	3.35. Grain Growth in Sintering	292

	3.35.1. Grain Growth	292
	3.35.2. Pinning Grain Boundaries	293
	3.35.3. Exaggerated Grain Growth	294
	3.35.4. Crystallography of Ceramic	295
	3.36. Machining Process	296
	3.37. Material Removing Process	296
	3.37.1. Mounted Abrasive Machining	297
	3.37.2. Free Abrasive Machining	298
	3.37.3. Impact Abrasive Machining	298
	3.37.4. Chemical Machining	301
	3.38. Mechanical Behaviour of Ceramics	303
	3.38.1. Strength of Ceramic	304
	3.38.2. Factor Affecting the Strength of Ceramic	306
	3.39. Strength Measurement of Ceramic	308
	3.39.1. Tensile Strength	308
	3.39.2. Compressive Strength of Ceramics	310
	3.39.3. Bending Strength	311
	3.39.4. Four Point Bending Test	312
	3.39.5. Uniaxial Tensile Strength	313
	3.39.6. Biaxial Strength of Ceramic	314
	3.40. Hardness	315
	3.40.1. Measurement of Hardness	315
	3.40.2. Brinell Hardness Test	318
	3.40.3. Vicker Hardness Test	319
	3.41. Ceramic Toughness	322
	3.42. Measurement of Fracture Toughness	324
	3.42.1. Measurement of Fracture Toughness by Vicker Indentation	325
	3.43. Measurement of Bulk Modulus of Ceramic	327

	3.44. Bulk Modulus Calculation by Vicker & Spherical Indentation	329
	3.44.1. Bulk – Modulus of Thin Film	331
	3.45. Elasticity or Modulus of Elasticity	332
	3.45.1. Brittle Fracture	333
	3.45.2. Modulus of Elasticity	334
	3.46. Measurement of Elastic Modulus	335
	3.46.1. Ultrasonic Testing	336
	3.47. Adhesive Property of Ceramic Coating	338
	3.47.1. Scratch Test	339
	3.47.2. Inter-face Indentation Test	340
	3.47.3. Stess – Strain Curve	342
	3.48. Effect of Temperature on Ceramic Strength	343
	3.49. Ceramic Strengthening Technique	344
	3.49.1. Dispersion Technique	345
	3.49.2. Controll Crystallisation of Glass	345
	3.49.3. Chemical Tempering	346
	3.49.4. Thermal Tempering	346
	3.49.5. Optimum Design Concept	346
	3.49.6. Crack – Tip Blunting	346
	3.49.7. Transformation Saturation	346
	3.50. Strength Analysis of Ceramic Materials	347
	3.51. Ceramic Toughening Mechansim	349
	3.51.1. Crack Deflection	351
	3.51.2. Crack – Bridging	353
	3.51.3. Pullout	354
	3.52. Transformation Toughening	354
	3.52.1. Transformation – Toughened ZrO ₂	357
	3.53. Modulus Transfer	358

	3.54. Micro-crack Toughening	358
	3.55. Brittleness of Ceramics	361
	Question for Discussion	362
	References	364
4	Property of Ceramic Material	376
	4.1. Property of Ceramic Material	376
	4.2. Thermal Property	376
	4.2.1. Heat Capacity	377
	4.2.2. Thermal Expansion	378
	4.2.3. Thermal Expansion of Glass	381
	4.2.4. Thermal Conductivity	382
	4.2.5. Thermal Shock	386
	4.2.6. Melting Point Temperature of Ceramic Material	389
	4.3. Electrical Property of Ceramic Material	394
	4.3.1. Die – Electric Property	395
	4.3.2. Die – Electric Strength	396
	4.3.3. Die - Electric Constant	398
	4.3.4. Volume Resistivity & Surface Resistivity	400
	4.3.5. Volume Resistivity	400
	4.3.6. Surface Resistivity	401
	4.3.7. Electron Mobility	403
	4.3.8. Effect of Temperature on Ceramic Resistivity	403
	4.3.9. Electrical Conductivity	404
	4.3.10. Ionic Conductivity	406
	4.3.11. Ceramic Semi-conductor	410
	4.3.12. Ceramic Super conductor	412
	4.3.13. Ferro – Electricity	413
	4.4. Mechanical Property of Ceramic Material	414
	4.4.1. Compressive Strength	416

	4.4.2. Bending Strength	417
	4.4.3. Fatigue Strength or Fatigue	419
	4.4.4. Fracture Toughness	421
	4.4.5. Modulus of Elasticity	422
	4.4.6. Ceramic Hardness	427
	4.4.7. Wear Resistance	432
	4.4.8. Ceramic Brittleness	433
	4.4.9. Creep in Ceramic	434
	4.4.10. Factor Affecting Mechanical Properties of Ceramic Material	437
	4.4.11. Specific Application of Mechanical Properties	438
	4.5. Optical Property of Ceramic Material	439
	4.5.1. Absorption	440
	4.5.2. Transparency in Ceramic Material	443
	4.5.3. Factor Affecting Transparency	444
	4.5.4. Translucency	446
	4.5.5. Refractive Index	446
	4.5.6. Colour in Ceramic	452
	4.5.7. Phosphorescence	455
	4.5.8. Laser	456
	4.6. Chemical Property of Ceramics	457
	4.6.1. Oxidation Characteristics of Ceramics	458
	4.6.2. Reduction of Ceramic Material	460
	4.7. Physical Property of Ceramic Material	462
	4.7.1. Density	462
	4.7.2. Bulk – Density	464
	4.7.3. Theoretical Density	465
	4.7.4. Specific Gravity	466
	4.7.5. Melting Point Temperature of Ceramic Material	467

	4.8. Nuclear Property	469
	4.9. Piezo – Electric Property	470
	4.9.1. Application of Piezoelectric Ceramic Material	470
	4.10. Pyroelectric Ceramic Material	473
	4.11. Ferro-electric Ceramic Material	473
	4.11.1. Mechanism of Ferro-electricity	474
	4.12. Magnetic Behaviour of Ceramic Material	477
	4.12.1. Mechanism of Magnetic Effects Generation	478
	4.12.2. Magnetic Effects Occurrence Due to Electrons	478
	4.12.3. Magnetic Effect Occurrence Due to Crystal Structure	479
	4.12.4. Type of Magnetic Ceramic	482
	4.12.5. Application of Magnetic Ceramic Materials	482
	4.13. Factor Affecting Ceramic Properties	484
	4.13.1. Effect of Composition & Processing	485
	4.13.2. Effect of Impurities on Ceramic Composition	489
	4.13.3. Effect of Sized Particle Distribution	489
	4.13.4. Reactivity of Ceramic Composition	490
	4.13.5. Effect of Processing on Property	491
	4.13.6. Single Component Ceramic	491
	4.14. Composition or Compound Required for Pottery Glazing and Clay Body Composition	514
	4.15. Effect of Micro-structure & Crystal Structure on Ceramic Property	519
	4.15.1. Single Ceramic Element Structure	520
	4.15.2. Binary Ceramic Structure	520
	4.15.3. Ternary Ceramic Structure	522
	4.15.4. Carbide & Nitride Structure	526
	4.16. Micro – Structure of Ceramic Material	527

	4.17. Effect of Impurities on Ceramic Property	530
	4.18. Effect of Flaws on Ceramic Property	531
	4.19. Effect of Grain Size on ceramic Property	531
	4.20. Effect of Environment & Temperature on Ceramic Property	532
	4.20.1. Effect of Temperature on Ceramic Property	532
	4.21. Effect of Composition, Stoichiometry & Environment	535
	4.22. Stoichiometric Ceramic	536
	4.23. Effect of Fatigue on Ceramic Property	536
	4.24. Effect of Chemical on Ceramic Property	536
	4.25. Effect of Reduction on Ceramic Property	538
	4.26. Effect of Water Vapour Environment	538
	4.27. Decomposition	539
	4.28. Effect of Corrosive Liquid	539
	4.29. Effect of Corrosive Liquid with Temperature	539
	4.30. Effect of Gas Condensation on Ceramic Surface	540
	4.31. Effects of Coal Combustion Environment	542
	4.32. Reaction between Ceramic Solid Surface with another Solid Surface	543
	4.33. Effect of final Machining on Ceramic Surface	543
	4.33.1. Removal of Surface Material	545
	4.34. Effect of Temperature on Ceramic Components	546
	4.34.1. Thermal Property	546
	4.34.2. Thermal Shock Resistance Improvement	546
	4.34.3. Effect of Temperature on Heat Capacity of Ceramic	547
	4.34.4. Effect of Temperature on Thermal Conductivity of Ceramic	549
	4.34.5. Effect of temperature on Thermal Expansion of Ceramic	551

	4.34.6.Effect of Temperature on Young Modulus of Ceramic Material	553
	4.34.7.Effect of Temperature on Strength of Ceramic Material	554
	Question for Discussion	555

	5.17.3. Application of Silicon Nitride (Si ₃ N ₄) Ceramic	611
	5.18. Silicon Nitride Ceramic Cutting Tool	614
	5.18.1. Types of Silicon Nitride based Ceramic Tools	614
	5.19. Silicon Nitride Bonded Silicon Carbide Bricks	615
	5.20. Sialons	616

	5.20.1. Manufacturing Process of Sialons	616
	5.21. Cermet	617
	5.21.1. Cermet Bodies	618
	5.21.2. Cemented Carbide [Hard metal or Metal Bonded Carbides]	620
	5.21.3. Cermet Pieces	621
	5.22. Application	621
	5.22.1. Chromium – Alumina Cermet	621
	5.23. Bio – Ceramic	622
	5.24. Hydroxyapatite Bio-ceramic (HA)	625
	5.24.1. Preparation of Dense HA	626
	5.24.2. Preparation of Porous HA	626
	5.25. Calcium Aluminate Bio-ceramics	627
	5.26. Bio-ceramic Coating	627
	5.27. Carbon – Bio Ceramics	628
	5.28. Dental Ceramic	629
	5.29. Alumina (Al_2O_3) Bio-ceramic	630
	5.30. Zirconia (ZrO_2) Bio-ceramic	630
	5.31. Bio-ceramic Composites	631
	5.32. Bio-active Glass	632
	5.32.1. Manufacturing of Bio-active Glass	633
	5.32.2. Structure of Bio-active Glass	633
	5.32.3. Classification of Bio-active Glass	634
	5.32.4. Bio - Active Glass 8625	635
	5.32.5. Bio-glass 45S5	635
	5.32.6. Bio-glass 13-93	636
	5.32.7. Phosphate Bio-active Glass	636
	5.32.8. Bio-active Borate Glass	637
	5.33. Sol-gel Bioactive Glass	637

	5.33.1. Manufacturing of Sol-gel Bioactive Glass	638
	5.33.2. Manufacturing of Sol-gel Bioactive Glass by Acid Catalyses Process	638
	5.33.3. Radio-therapy Glass	640
	5.34. Application of Bio-active Glass	640
	5.34.1. Clinical Importance of Bio-active Glass	641
	5.34.2. Application of Bioactive Glass in Dental Surgery and Cranio-maxillofacial Augmentation	641
	5.34.3. Application of Bio-glass in Bone Grafting	643
	5.34.4. Bone Grafting Material	644
	5.34.5. Application of Bioactive Glass in Drug Delivery System	646
	5.34.6. Drug Delivery of Antibiotics for Treatment of Osteomyelitis	646
	5.34.7. Application of Bioactive Glass Delivery of Growth Factors	647
	5.34.8. Application of Bio-glass as a Coating of Implants	648
	5.35. Bio-active Glass Ceramic	650
	5.35.1. Cerabone® A-W Bio-active Glass Ceramic	651
	5.35.2. Ceravital® Bio-active Glass Ceramic	651
	5.35.3. Bio-vert l® Bio-active Glass Ceramic	651
	5.36. Castable	653
	5.36.1. Castability	653
	5.36.2. Casting Rate	654
	5.37. Cements	654
	5.38. Classification of Cements	655
	5.38.1. Portland Cement	655
	5.38.2. Manufacturing Steps for Portland Cement	656
	5.38.3. High-alumina Cement (HAC)	658

	5.38.4. Manufacturing Process	658
	5.38.5. White Cement (WC)	659
	5.38.6. Coloured Cement (CC)	659
	5.38.7. Pozzolanic Cement (PzC)	660
	5.38.8. Air-entraining Cement (AEC)	660
	5.38.9. Hydrophobic Cement (HpC)	660
	5.38.10. Nano-cement	661
	5.38.11. High Temperature Cement	661
	5.38.12. Calcium Aluminate Cements	662
	5.38.13. Synthesis of Calcium Aluminates	662
	5.38.14. Mono-aluminium Phosphate Cements	662
	5.38.15. Sodium Silicate Cements	663
	5.38.16. Slag Cement	663
	5.38.17. Gypsum Cement	663
	5.39. Refractories	666
	5.40. Classification of Refractory	667
	5.40.1. Traditional Refractory	667
	5.40.2. Chemico-mineralogical Classification	668
	5.40.3. Refractoriness	668
	5.41. Manufacturing Process	668
	5.42. Silica Refractories	669
	5.42.1. Silica Bricks	669
	5.42.2. Raw Material Preparation for Silica Bricks	670
	5.42.3. Sintering or Firing of Green Silica Bricks	670
	5.42.4. Semi-silica Refractories	670
	5.43. Magnesite Refractories	672
	5.43.1. Process	672
	5.43.2. Magnesite Bricks	673
	5.43.3. Raw Composition Preparation & Processing	673

5.44. Dolomite Refractory	674
5.44.1. Semi-stable Dolomite Bricks	675
5.44.2. Stable Dolomite Bricks	675
5.44.3. Manufacturing Steps	676
5.45. Chrome Refractory	676
5.45.1. Chrome Refractory Bricks	676
5.46. Chrome–magnesite Refractories	677
5.46.1. Manufacturing of Chrome-magnesite refractories	678
5.47. Carbonaceous Refractories	679
5.47.1. Manufacturing of Carbonaceous Refractory	679
5.48. Fire Clay Refractories	680
5.49. Aluminous Fire Brick	680
5.50. Mullite Refractory Brick	680
5.51. Alumina Refractory Bricks (Corundum Brick)	681
5.52. Stabilized Zirconia Bricks	681
5.53. Barium Aluminium Silicate Refractories	681
5.54. Periclase Refractory Bricks	682
5.55. Olivine Refractory Bricks	682
5.56. Forsterite Refractory Bricks	683
5.57. Spinel Refractories	683
5.58. Silicate Refractories	683
5.59. Zirconate Refractories	684
5.60. Carbide Refractories	684
5.61. Nitrides Refractories	685
5.61.1. Manufacturing of Nitrides Refractory	685
5.62. Silicide Refractories	685
5.63. Sulphate Refractories	685
5.64. Boride Refractories	685
5.65. Monolithic Refractories	686

	5.66. High Temperature Refractories	686
	5.67. Selection of Refractory Oxides	688
	5.68. Applications Oxide Refractory	688
	5.69. Other Important Application of Refractories	688
